MANUFACTURED EXCLUSIVELY
BY METRA ELECTRONICS

The new Daytona Lights™ series is engineered and manufactured to meet all international standards while providing incredible value for vehicle owners. This new product line of aftermarket automotive lighting includes headlight replacement bulbs and decoders, dual-row and ultra-slim LED lightbars, and cube-style LED lights at an affordable price.

Advanced thermal management, short circuit and open circuit protection and many other innovative features repel moisture and extend the overall life of the product. All of these lights are rated IP67 and undergo rigorous testing during the development and manufacturing process and once again before leaving the factory. Metra’s 70+ year history, experience and approach to engineering and manufacturing ensures that all of these products stand out among the competitors and provide both quality and value.

Auxiliary driving and fog lights are intended for use solely as auxiliary lighting. They are not intended to be used for headlight purposes, nor are they certified for headlight usage. Auxiliary lights are designed to improve visibility during night time driving and inclement weather. Irresponsible use of any auxiliary light can be dangerous and illegal. Auxiliary driving lights are intended to supplement the high-beam of a standard headlamp system. They are not intended for use alone or with the low-beam of a standard headlamp system. Lighting laws vary from state to state.
