AMPLIFIER BYPASS HARNESS

FITS LINCOLN NAVIGATOR WITH THX 2004-2006

 SALES 386-257-2956

PRODUCT OVERVIEW

Install a new car radio faster with this factory amplifier bypass harness that plugs right into the vehicle's connectors, allowing you to hook up the radio to the vehicle's electrical system. On one side, the wiring harness is color-coded with wires that you'll connect or solder into the aftermarket radio/receiver. The other side has a vehicle-specific adapter that connects directly to the original radio connectors for a quicker installation without having to cut each of the wires.

Keep in mind that you may need additional parts to complete your installation, including a dash kit, antenna adapter, and, depending on your vehicle, a special interface adapter to retain audio controls on your steering wheel or other important vehicle functions like navigation, video, and more. Look up your vehicle for more information.

Features:

- Factory amplifier bypass wiring harness for fast and easy aftermarket radio installation
- Plugs into the car's original radio connectors
- Designed for vehicles with THX®
- Includes a 12" amplifier integration harness
- Color-coded wires on the other side are connected to the aftermarket radio
- No wire cutting needed for factory radio connectors
- Provides electrical power to the radio
- A tech support number is available for installation help 7 days a week
- Enter your vehicle model to see if this is compatible with your vehicle
- 1-year warranty

Includes:

- (2) Two harnesses
