# MOTORCYCLE HEADLIGHT AND AUXILIARY LIGHTS KIT WITH RGB HALOS

SALES 386-257-2956

### PRODUCT OVERVIEW

BC-706RGBKT introduces a different style of 7-inch headlights with addressable RGB LEDs and features (9) 5-watt LEDs in the 7" headlight. The headlights produce 3,600 lumens of illumination for the high beam and 2,400 lumens for the low beam. This kit also includes a set of matching 4.5-inch auxiliary lights with RGB LED lights and the RGB controller. The fog lights have (6) 5-watt LEDs each that produce 1,400 lumens of illumination. Drivers will be able to change the color of their lights with the swipe of a finger with 120 different color changing patterns that can sync to music and are controlled via the Car-lights mobile app, available for Android® and iOS® devices. The new RGB replacement headlight and auxiliary lights are rated IP67 and use the standard connectors.
