BC-HARLE2 TURN SIGNAL LOAD EQUALIZER FOR HARLEY-DAVIDSON®

SALES 386-257-2956

BC-HARLE2

Fits Most Harley-Davidson
2010-2013* FLHX/FLTRX Models

PRODUCT OVERVIEW

Saddle Tramp has designed extra bright LEDs to replace factory turn signals and brake light indicators for a wide range of Harley-Davidson® models using Generation II brighter and flat-style LEDs. Sold as a pair. For 2013 and earlier models, Saddle Tramp load equalizers may be required to stop hyper flashing when replacing LED turn lights.

- Use to slow the turn signal rate and stop hyper flashing when installing LED turn signal lights
- Plug and play installation, no cutting and splicing required
- Compatible with Harley-Davidson factory alarm
- Warning: Extremely HOT when working - Do not mount on plastic - Make sure it's not touching any wires
