

Universal LED projector with mount

Switchback Operation:

This device operates using a latched switch. To cycle through the beam pattern, quickly turn light on, off, then back on.

Selected pattern will be held in memory, during normal off/on operation of the switch.

Red wire = +12 Volts DC

Black wire = Chassis ground

Switchback Operation order:

High beam

On, Off, On

Low Beam

On, Off, On

Strobe

On, Off, On
