HE-CHASE-PIH CHASING LED 12V POWER INJECTOR - 4 PACK

 SALES
386-257-2956

PRODUCT OVERVIEW

These 12-volt power injectors make it possible to install Heise LED chasing lighting kits as a single loop of LED lights that encircle the entire vehicle and control it all from one Heise Connect chasing controller. Simply add one of the power injectors in line with the LED strip installation every 15 feet or every 16 rock lights. This will increase the length, eliminating the problem of splitting the installation to either side of the vehicle. These power injectors work cohesively with all Heise chasing LED lighting as part of the Heise Connect Universe (HCU).

- Input voltage: 11-16V
- Compatible with all chasing Heise LED products:
 - Strip lights
 - Rock lights
 - Tube lights
 - Wheel rings
 - Lightbars
 - Cube lights
 - Underglow kits
 - Grille lighting kits
- 1-year warranty
- Included:
 - (4) 10-inch inline power injectors with 6-inch power input cables
 - (8) Water-tight electrical connectors
