32" HDR SERIES LIGHT BAR

SALES 386-257-2956

PRODUCT OVERVIEW

Heise is going brighter than ever with an even higher output lightbar series that produces more lumens than their existing dual-row series. These powerful lightbars are engineered with integrated-epoxy encapsulated electronics, a virtually unbreakable polycarbonate lens, a military breather port and die-cast aluminum housing. They have been torture-tested and are IP67 rated to withstand the worst environments and are available in lengths from 8 to 50 inches. The hybrid 90-degree flood beam pattern offers a wide angle of illumination while the 8-degree spot beam provides intense light in the center flanked by the wide beam for extra coverage.

- Length: 32"
- Wattage: 180W
- Raw Lumens: 16,200 lm
- Current Consumption @ 13.8V: 11.3A
- IP Rating: IP67
