SINGLE ZONE CONTROLLER WITH BLUETOOTH® WIRELESS CONNECTIVITY + REMOTE

 **SALES** 386-257-2956

PRODUCT OVERVIEW

This easy-to-install controller with Bluetooth® wireless connectivity and wireless remote puts audio controls at your fingertips. It is equipped with built-in Bluetooth® wireless technology and auxiliary input, and its compact size makes it easy to conceal. A high-quality internal digital signal processor produces lossless audio output to your sound system. The controller is small enough to mount to a steering wheel easily and is rated IPX7, making it ideal for marine and powersports applications.

- Control volume +/-, track FWD/PREV, PLAY/PAUSE, and auxiliary input
- Equipped with QCC3034 Bluetooth® 5.1 chips
- Easily switch between wireless input and auxiliary input
- 24-bit lossless audio processor
- Rated IPX7 for powersports & marine applications
- Drill-less mounting solution included
- Controller: 2.87" x 2.8" x .94"
- Wireless remote with steering wheel mount: 1.85" x .78"
- Amplifier remote turn-on output
- 5.2V 2-channel RCA output
- Wireless range: 35ft/11m
- 1-year warranty
