

70-2103T INSTRUCTIONS

2004-05 Chevrolet Malibu Vehicle Personalization Service Harness

This harness is designed to allow the installer to plug in the factory radio into the harness without removing the new radio installed. The factory radio can change many personalization features (see owners manual for a list and description of personalization features). You can place the harness to be plugged into the factory radio behind the fuse access panel which is located on the passenger side of the center console. This allows for easy access for the installer or owner to plug the factory radio in, change the personalization features, and then store the factory radio for future use.
