Toyota Tweeter Harness

- 1. Tweeter positive + 2. Midrange positive +
- 3. Tweeter negative -4. Midrange negative -

There are (4) wires in this harness, (2) for the midrange speakers and (2) for the tweeters. Both speakers are connected together and the tweeter is protected with a factory capacitor. To retain both speakers use the harness as is. To use the speakers separately, refer to the drawing above for pin locations and polarity.
